

S5MA6ENA

EXAMINATION DATE: 29TH NOVEMBER

EXAMINATION TIMES: 9.45-11.15

TEACHERS: MS EGHOLM AND MR SEARLE

NAME OF STUDENT:

FORMAT:

There are 9 questions in this booklet.

There are a total of 67 marks available.

Please write your answers in this booklet

DURATION OF THE EXAMINATION:

90 minutes

AUTHORIZED MATERIAL:

Pencil and Ruler for graphs

NOTE

- Answers must be supported by explanations that show the reasoning behind the results or solutions provided.
- If graphs are used to find a solution, they must be sketched as part of the answer.
- Unless indicated otherwise, full marks will not be awarded if a correct answer is not accompanied by supporting evidence or explanations of how the results or the solutions have been achieved.
- When the answer provided is not the correct one, some marks can still be awarded if it is shown that an appropriate method and/or a correct approach has been used.

Stay calm and believe in yourself!

| Question 1 | Indices |
|------------|---|
| 2 marks | <p>Simplify the following expressions:</p> <p>a) $5x^3y^2 \times 3x^4y^3$</p> <p>Answer:</p> |
| 2 marks | <p>b) $\frac{20p^4q^5}{4pq^2}$</p> <p>Answer:</p> |
| 2 marks | <p>c) $\frac{a^2}{a\sqrt{a}}$</p> <p>Answer:</p> |
| 2 marks | <p>d) $(x^2y^4)^{-\frac{1}{2}}$</p> <p>Answer:</p> |

| Question 2 | Standard form |
|------------|--|
| 2 marks | <p>Given that $p = 6.5 \times 10^6$, $q = 5 \times 10^{-4}$ and $r = 1.8 \times 10^3$, evaluate the following:</p> <p>a) pq</p> <p>Answer:</p> |
| 3 marks | <p>b) $\frac{p}{q}$</p> <p>Answer:</p> |
| 3 marks | <p>c) q^2r</p> <p>Answer:</p> |

| Question 3 | Quadratic equations |
|------------|--|
| 2 marks | <p>Solve the following equations:</p> <p>a) $x^2 - 6x + 5 = 0$</p> <p>Answer:</p> |
| 3 marks | <p>b) $x^2 + 2x - 2 = 0$</p> <p>Answer:</p> |
| 3 marks | <p>c) $2x^2 - x - 6 = 0$</p> <p>Answer:</p> |

Question 4

Graphs

The number of plastic bottles found in a lake each month can be modelled by the formula

$$n = 10 \times 2^t$$

where t is the time in months.

1 mark

- a) **Determine** how many plastic bottles was found initially.

Answer:

2 marks

- b) **Complete** the table

| Months (t) | 0 | 1 | 2 | 3 | 4 |
|---------------------------|---|---|---|---|---|
| Number of Bottles (n) | | | | | |

2 marks

- c) Use the diagram below to **plot** a graph showing the relationship between n and t .

1 mark

- d) **Determine** the type of function for the graph.

Answer:

1 mark

- e) Use your graph to **estimate** how many bottles were found after 3.5 months.

Answer:

2 marks

b) $-9x - p^2 = -27p$

Answer:

3 marks

c) $3 = \frac{y-z}{\sqrt{x}}$

Answer:

Question 7

Vectors

Two vectors \vec{p} and \vec{q} are shown on the grid.

1 marks

a) Write any position vector that is equal to $\vec{p} - 2\vec{q}$.

Answer:

1 marks

b) Write any position vector that is equal to $-2\vec{p} - \vec{q}$.

Answer:

3 marks

c) By drawing on the grid, **show** that

$$(\vec{p} - 2\vec{q}) + (-2\vec{p} - \vec{q}) = -\vec{p} - 3\vec{q}$$

3 marks

d) Find the value of c and d :

$$\begin{pmatrix} c \\ 5 \end{pmatrix} + 2 \begin{pmatrix} 3 \\ d \end{pmatrix} = \begin{pmatrix} d \\ 8 \end{pmatrix}$$

Answer:

Question 8

Angles and the unit circle

3 marks

a) **Convert** the following degrees to radians

45° , 225° , 720° , 30°

Answer:

3 marks

b) **Draw** the angles from above in the unit circle

Question 9

Trigonometric functions

The depth of water, d metres, in a harbour at a time, t hours after midnight, is given by

$$d = 4 \cos\left(\frac{\pi}{6}t + \pi\right) + 10$$

3 marks

a) **Fill out** the missing values in the table below

| | | | | | | | | | | | | | |
|-----|---|-----|---|----|----|------|---|------|----|----|----|-----|----|
| t | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| d | 6 | 6.5 | 8 | 10 | 12 | 13.5 | | 13.5 | 12 | 10 | | 6.5 | |

2 marks

b) On the grid below, **draw** the graph of $d = 4 \cos\left(\frac{\pi}{6}t + \pi\right) + 10$

3 marks

c) The depth of water must be at least 9 metre for a ship to enter the harbour. At midnight a ship is waiting to enter the harbour.

Use the graph to **estimate** the earliest time the ship can enter.

Answer:

END OF TEST
